

What are the problems related to climate change?

Shrinking ice floes.

- The problems linked to climate change are the regression of the ever-decreasing ice pack.

Pollution

- One of the main causes of global warming is pollution.

Middle School

- As we are in a period where we are growing up and our clothes are not worn for a long time, we could organize sales of clothes that we no longer wear.

Why this project?

Because clothing industry
produces
a bad carbon footprint.
